DETAILED ACTION

Receipt of applicants' amendments and remarks submitted April 29, and June 3, 2003 have been received. The amendments and remarks are persuasive in overcome the rejections set forth in the prior office action.

Double Patenting Rejections

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3-5 of U.S. Patent No. 6,235,774 (IDS). Claims 3-5 in '774 is directed to a method of treating Parkinson's disease. The compound employed herein is among the five compounds specified in claim 5. Note the rejection is made on assumption that the typographic errors presented in the patent would be corrected. 6,235,774 is a 371 of PCT/EP98/07197 with PCT Pub No. WO99/26621 (in German). Based on WO99/26621, o-"benzenesulphimidyl" employed in '774 should be o-benzoisulphimidyl. Also the drawing of R3 is column 2 is incorrect.

Claim Rejections 35 U.S.C. 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fahrig et al. (WO99/26621, IDS).

5. Fahrig et al. teaches a method of treating Parkinson's disease by using aminomethylchromans. The compound employed herein is among the five most preferred compounds. See, particularly, pages 5-8.

Fahrig does not teach particularly employ the compounds herein.

6. However, it would have been prima facie obvious to a person of ordinary skill in the art, at the time the claimed the invention was made, to employ the compounds herein for treating Parkinson's disease because the compound is one of the most preferred compounds disclosed.
